

Profile

I am a developer with business analyst roots, which means that not only do I love solving problems but I know how to communicate with the customer and help turn their needs into solutions. I know my way around an IT project, from waterfall to agile, and points in between. I am excited and intrigued by technology and all of its possibilities, and enjoy learning new things.

Experience

SOFTWARE ENGINEERING

MAY 2015 - JULY 2015 THE IRON YARD ATLANTA – 2015

Back End Engineering student utilizing Ruby on Rails.

Designed the logic and database needs required to run and scale web applications.

Created databases, APIs, and user interface frameworks.

Deployed production quality applications to the cloud, integrated with online services, and enabled mobile and front end applications

Architected and created server-side systems

Optimized systems for mobile and desktop

RUBY TRAINING SEPTEMBER 2014 -MAY 2015

Self-study - online courses in Ruby on Rails

BUSINESS ANALYSIS

OCTOBER 1998 - SEPT 2014

Delta Technology Southern Company

Manheim Technology Suntrust Bank

AutoTrader.com AT&T

Centers for Disease Control

Developed and managed requirements documentation that defined key functional and non-functional requirements.

Translated business requirements into system requirements geared towards an agile development environment specifically around use cases, user stories and scenarios/business rules.

Worked with architects to ensure requirements were adequately incorporated into system design.
